Claudiu Apetroaei

PHP Software Engineer

Cluj-Napoca Metropolitan Area

Summary

As a PHP Software Engineer, my expertise spans both back-end and front-end development, focusing on creating scalable and efficient solutions. I prioritize clean, maintainable code, enhancing system performance and solving complex issues with a keen eye for detail. Collaboration is key in my approach, working alongside teams to deliver software that surpasses expectations. I'm dedicated to continuous learning, optimizing existing code, and innovating user-centric features, aiming to deliver excellence in every project I undertake.

Experience

Yonder

PHP Software Engineer

June 2021 - Present (3 years 2 months)

Cluj, Romania

As a PHP Software Engineer for Yonder, my portfolio currently includes two ongoing pivotal projects:

1## Assisting in the development of an application for a major medical company in the USA, our team is enhancing cost management and medical product logistics for hospital warehouses globally. My contributions focus on integrating new operational centers worldwide and driving technical improvements within the application.

2## Collaborating with a diverse Romanian-Dutch team, I contribute to the development and maintenance of a high-traffic insurance extranet application, facilitating user engagement from policy creation to accessing financial details. This initiative involves working directly with a leading entity in the insurance market, focusing on enhancing their operational workflows and user interaction mechanisms.

Beyond my project roles, I actively engage in sharing knowledge, delivering presentations not only within the PHP community but also across our company and business unit, contributing to a broader understanding of

technology applications. My involvement extends to leading candidate interviews, spearheading the onboarding process for new team members, and occasionally stepping in as a Scrum Master to ensure project success.

Main Skills at a Glance:

Languages & Frameworks: PHP (7+), Symfony (4+), API Platform, Zend, Twig, AngularJS.

Database Management: MySQL, Doctrine, MongoDB, ElasticSearch.

CI/CD & Collaboration Tools: Git, Jenkins, Jira, YouTrack.

Architecture: Monolith, Microservices, REST API, GraphQL.

Yonder

Fullstack Intern

October 2020 - November 2020 (2 months)

Cluj, Romania

During my internship, I had the opportunity to contribute to the development of a software application with a bidding functionality at its core, all within a nurturing and growth-oriented atmosphere. Operating in an Agile environment, I engaged in Scrum ceremonies and tackled tasks involving both front-end (AngularJS) and back-end (.NET Core) development, along with utilizing tools such as Entity Framework, SQL Server, Git, and Jira.

Throughout my internship, I honed my time management and communication skills, thriving in a well-coordinated team setting. Simultaneously, I cultivated a task-driven mindset, enhancing my punctuality and reliability. This enriching experience not only allowed me to learn and master various technologies but also taught me the importance of balancing productivity with enjoyment in a professional setting.

Education

Universitatea „Babeş-Bolyai” din Cluj-Napoca

Bachelor's degree, Computer Science · (2018 - 2021)

"Mihai Eminescu" National College in Botoşani

· (2014 - 2018)
